

Deadly Mustard

NG Learning Group 2005

Yarrilee State School, Hervey Bay, Q

Acrylic paint on paper

103 cm x 65 cm

I am a student of Yarrilee State School working on Australians at war. My artwork depicts the horrible and very scary Mustard Gas. It would make your lungs tight, you could become blind, you would have blisters, internal and external wounds. It would kill you. Years later they made proper gas masks.
