

**Functional Job Requirements  
For the Position of Deputy Principal  
Department of Education, Training and the Arts Queensland**

This document was developed for the following purposes: assisting in the development of rehabilitation programs for injured or ill employees, and providing detailed information about job demands to medical practitioners and allied health professionals undertaking medical reviews of Departmental employees.

This report identifies those activities which are essential to successful performance in this role. In determining whether a work activity is a “critical activity” the following questions are considered;

- Does the worker spend greater than 33% of designated work time performing this activity? and / or,
- Is specialized training/experience required to complete this activity? Has this been completed by only a small proportion of staff in this geographical region? and/or,
- Is this activity performed in an environment where no other workers are readily available to assist with its completion? and/or,
- Does this activity occur without prior notice and require immediate attention leaving no time to seek assistance to complete it? and/or,
- Is this activity core to the development of stakeholder relationships, which are essential to achieving successful outcomes? and/or
- Would an inability to perform this activity result in an increased health and safety risk to co-workers, students and/or members of the public?

The development process included; site observation of environments, staff interviews, staff feedback on draft documents and consideration of benchmark publications for the analysis and description of work activities and job demands specific to particular positions (the Revised Handbook for Analysing Jobs, the Occupational Information Network and the Australian Job Guide, 2006).

This report indicates the average time spent across a working week on each work activity and also on each physical demand of work. In order to make this information meaningful to the various users of this report, in some instances the time spent is expressed as a single word, as a percentage of total time or as an actual amount of time (i.e. hours and minutes). The timeframes used are based on the benchmark descriptions (from the publications above) for expressing frequency of performance of work tasks.

<b>Descriptor</b>	<b>Percentage of Time</b>	<b>Amount of Time based on 25 hours per week</b>
Not present	0%	0 mins
Rare	1%-7%	15 mins – 1 hour 15 mins
Occasional	8%-33%	1 hour 30 mins – 8 hours 15 mins
Frequent	34%-66%	8 hours 30 mins – 16 hours 30 mins
Constant	67%-100%	16 hours 45 mins – 25 hours

**Description of Deputy Principal:**

The Deputy Principal provides assistance to the Principal and is primarily involved in educational leadership and the overall management of all school staff as well as contributing to the establishment and maintenance of a supportive school environment and learning culture. The Deputy Principal is also involved in contributing to the development and implementation of school objectives, planning, establishment and the management and further development of personnel, finance, technology, assets, facilities and resources of the school to ensure their optimum use. The Deputy Principal plays a role in representing the school in the broader community and working with parents, community and business. In addition, the Deputy Principal has a duty of care to ensure the safety and wellbeing of all students within their care.

### Risk Based Physical Environmental Considerations:

- There may be clutter in the work area, increasing the risk of trip hazards, awkward bending and lifting, and poor storage practices
- Items, furniture and fixtures may be poorly positioned or designed by staff members, requiring the adoption of awkward postures
- There may be limited/confined space for movement during performance of some activities
- There may be constant low-level ambient noise (from students, traffic, school activities e.g. music practice etc)
- There may be limited lighting and ventilation in some facilities
- Some work may be performed outdoors or in an area exposed to the elements
- Fine motor work may be performed in temperatures of 16 degrees or lower and above 24 degrees, due to local environmental conditions and capacity to school facilities to control ambient air temperatures

### Psychosocial Risks to be Considered

Time pressure/high workload- while deadlines exist for many tasks, the level of demand is dependent upon school environment and staffing level. Deputy Principals may also be required to address multiple demands and a large number of unplanned interruptions may occur throughout the day.

Poor worker/team leader relationships- may exist in some environments.

Environmental Stress– constant low level ambient noise from students, PA announcements, school bells etc requiring considerable projection of voice to be heard. Some temperature variation during winter and summer.

Insufficient work breaks- shortened breaks may be taken on a voluntary basis due to high workload and time constraints. Breaks may be limited by meal and playground supervision duties, particularly if there is insufficient planning e.g. unplanned wet weather duties. Although break times are stipulated, teachers do not always receive an uninterrupted break.

Investigations - participate in reporting, investigation and resolution processes, including mandatory reporting of suspected child abuse or neglect and participation as a witness or party to performance, discipline, grievance, WorkCover or other processes.

Policies - comply with departmental policies, procedures, guidelines and the code of conduct, including undertaking risk management processes to ensure the health and safety of students and others under their supervision or direction.

### Social / Interpersonal Demands

### Considerations for Assessment of Physical Job Fitness:

- Assessment of sustained sitting capacity of 50 minutes (acknowledging ability to regularly vary posture)
- Sufficient flexibility to allow adoption of awkward postures when working with children, particularly at floor level
- Assessment of fine motor dexterity or actual keyboard operation for typing activities
- Symmetry, range and discomfort with movements of the spinal and peripheral joints, including hips, knees, ankles, shoulders and wrists
- Sufficient flexibility to allow adoption of awkward postures when working with students, particularly on floor level
- Ability to sustain constant dynamic standing throughout the day with minimal sitting breaks
- Sufficient visual and auditory function to enable interaction and response to students

### Other Considerations

- History of neck/shoulder discomfort associated with static and sustained repetitive neck flexion postures
- History of upper limb, lower limb or spinal pain with repetitious or static tasks
- History of lower back pain with sustained sitting
- Knowledge of ergonomic principles for clerical workstations/ ability to learn
- Knowledge of correct manual handling techniques i.e. ability to bend at hips, bend knees and squat with a neutral spine
- Knowledge of vocal health and techniques to enable safe projection of voice
