Department of Education, Training and the Arts

Acknowledgments

The *Next Step* team gratefully acknowledges the assistance of the members of the *Next Step* survey reference group and the organisations they represent:

Independent Schools Queensland

Queensland Catholic Education Commission

Education Queensland

Queensland Studies Authority

Queensland University of Technology

Queensland Secondary Principals' Association

Association of Principals of Catholic Secondary Schools of Queensland

Association of Heads of Independent Schools of Australia (Qld branch)

Department of Education, Training and the Arts

Office of the Government Statistician

The *Next Step* team extends sincere thanks to the many thousands of Queensland Year 12 graduates who gave up their time to complete surveys and participate in telephone interviews.

This research is funded by the Queensland Government.

Introduction

Aims of the project

The *Next Step* survey is an annual survey of every student who completed Year 12 in the previous year in Queensland, in Government and non-Government schools. The survey results show the initial study and work destinations of young people after completing school.

The objectives of the survey are to assist:

- parents and the wider public to know the achievements of students and to appreciate the range of options available to students
- schools to review and plan their services for students, especially in the senior years of schooling
- school systems to review their education policies as they affect the transition from school to further study and employment
- training bodies, universities, business and industry, local government and regional planners to plan their services.

The survey follows the destinations of students who completed Year 12 at Government schools, Catholic schools, independent schools and TAFE secondary colleges.

Methodology

The *Next Step* 2008 survey was conducted by the Department of Education, Training and the Arts through the Office of the Government Statistician (OGS), in accordance with the privacy provisions of the *Statistical Returns Act 1896*.

The survey targeted students who completed Year 12 in Queensland in 2007, including students at Government schools, non-Government schools and TAFE secondary colleges. All students who were awarded a Senior Certificate or Certificate of Post-Compulsory School Education (CPCSE) were included. The Senior Certificate is a formal record of achievement issued at the end of Year 12 to all students who complete at least one approved subject. The CPCSE is a separate certificate for students with an impairment or difficulties in learning that are not primarily due to socioeconomic, cultural and/or linguistic factors.

The targeted students were identified by means of a survey frame (or list) provided to the OGS by the Queensland Studies Authority (QSA). This list contained details for 41 889 Year 12 completers who were deemed in-scope for this survey.

The survey was conducted between 2 April and 17 May 2008, approximately six months after the young people left school. This timing was designed to be after tertiary education places for 2008 were accepted, and while most of these young people were still contactable via their 2007 home address details.

Responses were predominantly collected via computer-assisted telephone interviewing (CATI) with paper-based surveys collected from a small number of students for whom telephone details were not available. The average time for a completed interview was less than four minutes.

Prior to the survey, all Year 12 completers were sent a letter from the Queensland Minister for Education and Training advising them of the survey. Those without

usable telephone details but with a usable Australian or international address were sent a printed copy of the questionnaire and a reply paid envelope.

Completed paper-based questionnaires were returned directly to OGS for processing and data entry. All responding Year 12 graduates went into a draw for a chance to win one of several prizes offered as an incentive to encourage survey participation.

At the close of the survey, nearly all non-responding students for whom telephone numbers were available had received at least six attempts of contact. Non-responding students without telephone numbers were mailed two copies of the questionnaire. A total of 33 568 completed surveys were received. Of these, 306 were completed by paper-based questionnaire and 33 262 by CATI.

Regional reports are based on statistical divisions used by the Australian Bureau of Statistics.

The response rate for this region – Far North – was 74.2 per cent.

Please note that some survey participants did not provide information for particular survey questions. As a result, the number of responses shown in some tables may not reflect the totals reported for the main destinations appearing in Table 2.

Students were allocated to this region on the basis of the location of the school they attended in 2007. A list of schools from this region is shown in the Appendix (Table A1A).

Main Findings – Far North

Destinations

Nine in ten Year 12 completers in this region (90.5 per cent) were studying or in paid employment at the time of the survey. (Figure 1)

More than half (53.1 per cent) continued in some recognised form of education or training in the year after they left school. (Figure 1)

More than a quarter were undertaking a university degree (25.6 per cent). (Figure 1)

More than a quarter (27.5 per cent) were studying vocational education and training (VET). (Figure 1)

Over three in ten of the campus-based VET students were studying at Certificate IV level or higher (2.8 per cent of Year 12 completers overall). (Figure 1)

Almost one in five (19.0 per cent) were undertaking employment-based training, either as an apprentice (11.6 per cent) or trainee (7.4 per cent). (Figure 1)

In addition to the above study destinations, a further 11.7 per cent of respondents from this region deferred a tertiary offer in 2008 (deferrers are shown in Figure 1 in their actual current destination and in Figure 3 as deferrers).

More than four in ten (46.9 per cent) did not enter post-school education or training and were either employed (37.4 per cent), looking for work (7.2 per cent) or neither working, seeking work nor studying (2.3 per cent). (Figure 1)

Learning: education and training destinations

Amongst the 53.1 per cent of Year 12 completers continuing in some form of education or training, the most common fields of study were Engineering and Related Technologies, Management and Commerce (e.g. Business, Tourism), Health and Society and Culture (e.g. Arts, Law). (Table 4)

James Cook University and Tropical North Institute of TAFE were the tertiary institutions most commonly entered by Year 12 completers, accounting for over half of Year 12 completers (54.4 per cent) in post-school education and training destinations. (Table 5)

Earning: employment destinations

Of those young people working, more than four in ten were in part-time employment (41.2 per cent), while 32.4 per cent were in full-time employment, 16.1 per cent were apprentices and 10.3 per cent were trainees. (Table 6)

Over one-half of all Year 12 completers in paid employment (50.7 per cent) were working in just three occupational groups. Sales Assistants were the most common group (27.7 per cent), with the next most common being Clerks, Receptionists and Secretaries (11.9 per cent), followed by Food Handlers (11.1 per cent). (Table 7)

Not learning or earning

The survey identified 7.2 per cent of Year 12 graduates who were seeking work. (Figure 1)

Only one in every fifty Year 12 graduates were neither in a study destination nor seeking work (2.3 per cent). This group includes those with a disability or health condition, and those travelling or waiting for their course to commence. (Figure 1)

The most common reasons given for not continuing in study were that young people wanted a break from study (for example to travel), were undecided or considering options, or were not interested in further study. (Table 9)

Different people, different pathways

The survey found different patterns for different groups of young people.

Sex

There were differences in the destinations of males and females. In particular:

Females were more likely than males to enter a university degree course (29.1 per cent compared to 21.2 per cent of males), and just as likely to enrol in campus-based (i.e. not apprenticeships or traineeships) VET programs (9.6 per cent compared to 7.3 per cent of males). (Table 2)

Males were more likely to enter VET programs than university (34.4 per cent for VET compared to 21.2 per cent for university), while females were more likely to enter university than VET programs (29.1 per cent for university compared to 21.9 per cent for VET). (Table 2)

Males were over seven times more likely than females to enter an apprenticeship, while females were nearly twice as likely as males to commence a traineeship. (Table 2)

Females were more than seven times as likely to study in the field of Education, three times as likely to study in the field of Society and Culture, and twice as likely to study in the fields of Management and Commerce, Health, and Food, Hospitality and Personal Services. (Table 4)

Males were 12 times as likely to enrol in Architecture and Building, nine times more likely than females to enrol in Engineering and Related Technologies courses, and four times as likely to study in the field of Information Technology. (Table 4)

Females were more likely than males to be working in part-time jobs (47.7 per cent compared to 33.0 per cent). (Table 6)

Students of VET in schools

Almost one-third of Year 12 graduates in this region left school with a VET qualification (30.4 per cent), while 8.1 per cent were school-based apprentices or trainees (SATs). (Table 12 and Table 13)

Those with a VET qualification were less likely to enrol in a university degree course than others (17.1 per cent compared to 29.2 per cent). However, they had higher rates of transition to employment-based training (24.4 per cent compared to 16.6 per cent). (Table 12)

School-based apprentices and trainees were more likely to undertake apprenticeships and traineeships after school than other Year 12 completers (52.2 per cent compared to 16.0 per cent). (Table 13)

OP-eligible Students

Over four in ten (41.0 per cent) OP-eligible Year 12 completers had commenced a university degree. Year 12 completers who were not OP-eligible were twice as likely to transition to VET programs (40.3 per cent) than OP eligible students (19.2 per cent). (Table 14)

Certificate of Post-Compulsory School Education

There were insufficient numbers of Year 12 completers awarded a CPCSE in this region to show a meaningful comparison with other Year 12 completers. (Table 15)

Senior Certificate

There were insufficient numbers of Year 12 completers who were not awarded a Senior Certificate in this region to show a meaningful comparison with other Year 12 completers. (Table 16)

Indigenous

Indigenous Year 12 completers were less likely than their non-Indigenous peers to enrol at university (9.1 per cent compared to 27.6 per cent). Nonetheless, 17 Indigenous young people who completed the survey commenced university studies in 2008. (Table 17)

Indigenous students were more likely to enter into VET programs than their non-Indigenous peers (33.2 per cent for Indigenous and 26.8 per cent for non-Indigenous), however they were less likely to enter an apprenticeship (6.4 per cent compared to 12.2 per cent). (Table 17)

Indigenous Year 12 completers were more likely to be seeking work than their non-Indigenous peers (17.1 per cent compared to 5.9 per cent). (Table 17)

Language background other than English

Language background other than English (LBOTE) Year 12 completers demonstrated lower rates of transition to university than other respondents (21.0 per cent compared to 25.9 per cent). (Table 18)

Socioeconomic status

Transition to post-school education and training was associated with socioeconomic status (SES), increasing consistently from 50.6 per cent for the lowest SES quartile to 57.0 per cent for the highest SES quartile. (Table 19)

Regional comparisons

Year 12 completers in Far North had similar post-schooling destinations to other non-metropolitan Year 12 completers. (Figure 2)

Year 12 completers in Far North were less likely to enter university or campus-based VET programs than Year 12 completers in Queensland generally, but more likely to enter apprenticeships and traineeships. (Figure 2)

Year 12 completers not in education or training in Far North had similar employment destinations to Year 12 completers in other non-metropolitan regions. (Figure 5)

The occupations and industry categories of Year 12 completers in Far North closely resemble those of Year 12 completers statewide, however Far North had fewer in the Sales occupations and fewer in the Retail industry. (Table 7 and Table 8)

The main reasons given for not studying by Far North Year 12 completers resemble those of non-metropolitan and statewide respondents. (Table 10)

Comparisons between the 2005–08 destinations reveal a broadly similar pattern however university enrolments have decreased, while transition to full-time and part-time work has increased. (Figure 4)

More information on the survey is available at www.education.qld.gov.au/nextstep.

Main destinations

All respondents were categorised into their main destination, as outlined in Table 1. Tertiary students are assigned to the study categories regardless of their labour force status (i.e. they may also be working or even looking for work).

Table 1 Main Destination Categorisations, Next Step 2008

| Higher Education | |
|--|---|
| University (degree)* | Studying at degree level. |
| VET categories | |
| VET Cert IV+* | Studying Certificate IV, Diploma or Advanced Diploma (excluding apprentices and trainees). |
| VET Cert III* | Studying Certificate III (excluding apprentices and trainees). |
| VET Cert I-II/other* | Studying Certificate I or II (excluding apprentices and trainees). This category also includes students in an "unspecified" VET course, or in other basic courses (e.g. Year 12, bridging course, etc.) and with an unknown course level. |
| Apprentice | Working and in employment-based apprenticeship. |
| Trainee | Working and in employment-based traineeship. |
| No further education or training | |
| Working full-time [~] | Working full-time (35 hours or more per week) and not in a study or training destination. This includes people with part-time or casual jobs that total 35 hours or more. |
| Working part-time [~] | Working part-time or casual (fewer than 35 hours per week) and not in a study or training destination. |
| Seeking work | Looking for work and not in a study or training destination |
| Not studying and not in the labour force | Not in study or training, not working and not looking for work. |

*Some respondents are also in the labour market
