Glossary

ABS	Australian Bureau of Statistics - The central statistical authority for the Australian Government. The ABS provides the official national source of statistics for use by the government and the community.
ARIA	Accessibility/Remoteness Index of Australia – ARIA measures remoteness in terms of access along the road network from 11 340 populated localities to four categories of services centres.
ASGC	The Australian Standard Geographical Classification - a hierarchical geographical classification, defined by the Australian Bureau of Statistics (ABS), which is used in the collection and dissemination of official statistics. The ASGC provides a common framework of statistical geography and thereby enables the production of statistics which are comparable and can be spatially integrated.
CATI	Computer-Assisted Telephone Interviewing - A type of telephone interviewing in which the interviewer keys in answers to questions as they are received onto a data entry keyboard.
DET	Department of Education and Training
FT	Full-time
Full-time work	The ABS definition of an employed person who usually works 35 hours or more a week (in all jobs).
IBD	The International Baccalaureate Diploma Programme - a two-year international curriculum resulting in a qualification that is widely recognised by the world's leading universities. In order to be awarded the IBD, a student must meet defined standards and conditions set out by the International Baccalaureate Organisation. For further information regarding IBDs go to the International Baccalaureate Organisation website: www.ibo.org/diploma/
Indigenous	Refers to people who identify themselves as being of Aboriginal and/or Torres Strait Islander origin.
LBOTE	Language Background Other Than English is now used nationally in preference to 'Non-English Speaking Background' (NESB). For the purpose of this report international VISA students have been excluded from this category.
NILF	Not In the Labour Force – Refers to people who are not working and not looking for work

OGS	Office of the Government Statistician - The Office of the Government Statistician is the Queensland Government's lead statistical agency, and regularly conducts surveys with individuals, households and businesses to collect official statistics about issues of interest to Government and to people in Queensland.
OP	Overall positions - provide a statewide ranking of students based on achievement in Queensland Studies Authority subjects studied for the Queensland Certificate of Education. To receive an OP, students must study a certain number and pattern of Authority subjects, complete Year 12, and sit for the Queensland Core Skills Test.
PT	Part-time
Part-time work	The ABS definition of an employed person who usually works less than 35 hours a week (in all jobs).
QCE	Queensland Certificate of Education – The QCE is Queensland's senior school qualification, which is awarded to eligible students usually at the end of Year 12. The QCE recognises broad learning options and offers flexibility in what, where and when learning occurs. For further information regarding the QCE go to the Queensland Studies Authority website www.qsa.qld.edu.au
QCIA	Queensland Certificate of Individual Achievement - recognises the schooling achievements of students who have impairments or difficulties in learning. Before 2008, the certificate was known as the Certificate of Post-Compulsory School Education. For further information regarding the QCIA go to the Queensland Studies Authority website www.qsa.qld.edu.au
QSA	Queensland Studies Authority - agency responsible for syllabus development, assessment and the transition to tertiary education and post-school destinations for Queensland students from preschool to Year 12.
Regional Queensland	Includes all ABS Statistical Divisions except Brisbane, Gold Coast, Sunshine Coast and West Moreton. See Appendix 2, Figure A2A.
SAT	School-based apprenticeships and traineeships - allow high school students - typically those in Years 11 and 12 - to undertake a training qualification and work with an employer as a paid employee while studying for their senior statement.
SD	Statistical Division – A Statistical Division (SD) is an Australian Standard Geographical Classification (ASGC) defined area which represents a large, general purpose, regional type geographic area. SDs represent relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities.

SEIFA	Socio-Economic Indexes for Areas have been developed as way of assessing socio-economic status across the population. SEIFA enables areas in Australia to be ranked according to four different indexes. One of these is the Index of Relative Socio-economic Disadvantage, which provides a method of determining and comparing levels of social and economic disadvantage in given areas at a given point in time.
SES	Socioeconomic status - A relative position in the community as determined by occupation, income and amount of education.
South-East Queensland	Includes the ABS Statistical Divisions of Brisbane, Gold Coast, Sunshine Coast and West Moreton. See Appendix 2, FigureA2B.
SSD	The Statistical Subdivision (SSD) is an Australian Standard Geographical Classification (ASGC) defined area which represents an intermediate level, general purpose, regional type geographic unit. SSDs consist of one or more Statistical Local Areas (SLAs) and cover, in aggregate, the whole of Australia without gaps or overlaps.
TAFE	Technical and further education - A publicly-funded post-secondary organisation that provides a range of technical and vocational education and training courses and other programs
VET	Vocational Education and Training - Post-compulsory education and training, excluding degree and higher level programs delivered by further education institutions, which provides people with occupational or work-related knowledge and skills. VET also includes programs which provide the basis for subsequent vocational programs.

Introduction

Aims of the project

The *Next Step* survey is an annual survey of every student who completed Year 12 in the previous year in Queensland, in Government and non-Government schools. The survey results show the initial study and work destinations of young people after completing school.

The objectives of the survey are to assist:

- parents and the wider public to know the pathways of young people after completing Year 12 and to appreciate the range of options available to students
- schools to review and plan their services for students, especially in the senior years of schooling
- school system personnel to review their education policies as they affect the transition from school to further study and employment
- training bodies, universities, business and industry, local government and regional planners to plan their services.

The survey follows the destinations of students who completed Year 12 at Government schools, Catholic schools, independent schools and TAFE secondary colleges.

Methodology

The *Next Step* 2010 survey was conducted by the Department of Education and Training through the Office of the Government Statistician (OGS), in accordance with the privacy provisions of the *Statistical Returns Act 1896*.

The survey targeted students who completed Year 12 in Queensland in 2009, including students at government schools, non-government schools and TAFE secondary colleges. All students who were awarded a Senior Statement were included.

The targeted students were identified by means of a survey frame (or list) provided to the OGS by the Queensland Studies Authority (QSA). This list contained details for 44 526 Year 12 completers who were deemed in-scope for this survey.

The survey was conducted between 30 March and 12 May 2010, approximately six months after the young people left school. This timing was designed to be after tertiary education places for 2010 were accepted, and while most of these young people were still contactable via their 2009 home address details.

Responses were predominantly collected via computer-assisted telephone interviewing (CATI), with paper-based and web-based surveys collected from a small number of students for whom telephone details were not available. The average time for a completed interview was less than four minutes.

Prior to the survey, all Year 12 completers were sent a letter from the Queensland Minister for Education and Training advising them of the survey. Those without usable telephone details but with a usable Australian or international address were sent a printed copy of the questionnaire and a reply paid envelope.

Completed paper-based questionnaires were returned directly to OGS for processing and data entry. All responding Year 12 graduates went into a draw for a chance to win one of several prizes offered as an incentive to encourage survey participation.

At the close of the survey, nearly all non-responding students for whom telephone numbers were available had received at least six attempts of contact. Non-responding students without telephone numbers were mailed two copies of the questionnaire. A total of 36 638 completed surveys were received. Of these, 42 were collected via a web survey, 127 by mail and 36 469 by CATI.

Regional reports are based on statistical divisions used by the Australian Bureau of Statistics.

For this region – Gold Coast – a total of 3792 completed surveys were received resulting in a response rate of 79.2 per cent.

Please note that some survey participants did not provide information for particular survey questions. As a result, the number of responses shown in some tables may not reflect the totals reported for the main destinations appearing in Table 2.

Students were allocated to this region on the basis of the location of the school they attended in 2009. These data are shown in the Appendix (Table A2A).

Main Findings

At the time of the survey:

Destinations

- Almost nine in ten (89.1 per cent) Year 12 completers in this region were studying or in paid employment. (Figure 1)
- Six in ten (61.4 per cent) continued in some recognised form of education and training in the year after they left school. (Figure 1)
- Over one third were undertaking a university degree (38.4 per cent). (Figure 1)
- One in five (23.0 per cent) entered into studying vocational education and training (VET). (Figure 1)
- More than half of the campus-based VET students were studying at Certificate IV level or higher (8.3 per cent of Year 12 completers overall). (Figure 1)
- Over one in twelve (8.9 per cent) were undertaking employment-based training, either as an apprentice (6.0 per cent) or trainee (2.9 per cent). (Figure 1)
- In addition to the above study destinations, a further 7.9 per cent of Year 12 graduates from this region deferred a tertiary offer in 2010 (deferrers are shown in Figure 1 in their actual current destination and in Figure 3 as deferrers).
- Almost four in ten (38.6 per cent) did not enter post-school education or training and were either employed (27.7 per cent), looking for work (8.7 per cent) or neither working, seeking work or studying (2.2 per cent). (Figure 1)

Learning: education and training destinations

Amongst the 61.4 per cent of Year 12 completers continuing in some form of education or training the most common fields of study were Management and Commerce (e.g. Business, Tourism), Society and Culture, Health and Engineering and Related Technologies. (Table 4)

The Griffith University and Gold Coast Institute of TAFE were the two tertiary institutions most commonly entered by Year 12 completers, accounting for over half of Year 12 completers (53.7 per cent) in post-school education and training destinations. (Table 5)

Earning: employment destinations

Of those Year 12 graduates working, three quarters were in part-time employment (73.4 per cent), while 13.9 per cent were in full-time employment, 8.6 per cent were apprentices and 4.2 per cent were trainees. (Table 6)

More than one half of all Year 12 completers in employment (52.5 per cent) were working in just two occupational groups — Sales Assistants and Food Handlers. Sales Assistants were the most common occupational group (42.4 per cent), with the next most common being Food Handlers (10.1 per cent). (Table 7)

Not learning or earning

The survey identified 8.7 per cent of Year 12 graduates who were seeking work. (Figure 1)

A further 2.2 per cent of Year 12 completers were neither studying nor seeking work. This group includes those with a disability or health condition, and those travelling or waiting for their course to commence. (Figure 1)

The most common main reasons given for not continuing in study were that young people were wanting a break from study (for example to travel), undecided and considering their options, were not interested in further study and were waiting for course/training to begin. (Table 9)

Different people, different pathways

The survey found different patterns for different groups of young people.

Sex

There were differences in the destinations of males and females. In particular:

- Females were more likely than males to enter a university degree course (43.8 per cent compared to 32.8 per cent of males), and just as likely to enrol in campus-based VET programs (14.4 per cent compared to 13.9 per cent of males). (Table 2)
- Males were six times as likely as females to enter an apprenticeship, while females were almost twice as likely to commence a traineeship. (Table 2)
- Females were four times as likely as males to study in the field of Education and twice as likely to study Health, Food, Hospitality & Personal Services, Management & Commerce and Society and Culture. (Table 4)
- Males were nine times as likely as females to enrol in Information Technology courses, seven times as likely to enrol in Architecture and Building and six times as likely to enrol in Engineering and Related Technologies courses. (Table 4)
- Females were more likely than males to be working in part-time jobs (81.1 per cent compared to 64.1 per cent) yet less likely to be working in full-time jobs (11.6 per cent compared to 16.7 per cent of males). (Table 6)

VET students in schools

Six in ten of Year 12 graduates in this region left school with a VET qualification (60.7 per cent), while 15.5 per cent were school-based apprentices or trainees (SATs).

Those with a VET qualification were less likely to enrol in a university degree course than others (23.9 per cent compared to 60.9 per cent). However, they had higher rates of transition to employment-based training (12.2 per cent compared to 3.8 per cent). They were also more likely to enter employment with no further education and training (34.1 per cent compared to 17.7 per cent). (Table 12)

School-based apprentices and trainees were almost six times as likely to undertake apprenticeships and traineeships after school as other Year 12 completers (29.8 per cent compared to 5.0 per cent). (Table 13)

Overall Position/International Baccalaureate Diploma

Of those awarded an Overall Position/International Baccalaureate Diploma (OP/IBD), seven in ten (74.3 per cent) of Year 12 completers entered into further education with university being the main destination (62.7 per cent). However, the survey showed

that those not awarded an OP or an IBD had a higher rate of transition into employment-based training (16.0 per cent compared to 2.7 per cent) and a higher rate of transition into employment without further education and training (37.3 per cent compared to 19.4 per cent). (Table 14)

Disability

The survey was not able to identify students with a disability, but did include those who were awarded a Queensland Certificate of Individual Achievement (QCIA), which is intended for students with an impairment or difficulties in learning that are not primarily due to socioeconomic, cultural and/or linguistic factors.

Among Year 12 completers of this region, only 0.9 per cent (34 respondents) were identified as achieving a QCIA. (Table 15)

Queensland Certificate of Education

Eight in ten (83.8 per cent) respondents to the survey received a Queensland Certificate of Education (QCE). Those with a QCE were more likely to enrol in a university degree course than others (44.3 per cent compared to 8.3 per cent). However, those not awarded a QCE were just as likely to enter employment-based training (8.5 compared to 8.9) and more likely to enter employment with no further education and training (33.6 compared to 26.5). Those not awarded a QCE were nearly three times as likely to be seeking work as those awarded a QCE (18.9 per cent compared to 6.7 per cent). (Table 16)

Indigenous

Indigenous Year 12 completers were less likely than their non-Indigenous peers to enrol at university (31.1 per cent compared to 38.5 per cent). Nonetheless, 14 Indigenous young people who completed the survey commenced university studies in 2010. (Table 17)

Among Indigenous Year 12 students, 24.4 per cent (11 respondents) entered employment with no further education and training and 11.1 per cent (5 respondents) entered into an apprenticeship or traineeship. A further 13.3 per cent (6 respondents) were seeking work. (Table 17)

Language background other than English

Students with a language background other than English (LBOTE) were more likely to enrol at University (66.0 per cent compared to 36.9 per cent) and to enrol in campus-based VET courses (15.4 per cent compared to 14.0 per cent). (Table 18)

LBOTE students were less likely to be in employment-based training (3.2 per cent compared to 9.2 per cent). They were also less likely to enter employment without further education and training (9.0 per cent compared to 28.7 per cent). (Table 18)

Socioeconomic status

Transition to post-school education and training was strongly associated with socioeconomic status (SES), increasing consistently from 53.0 per cent for the lowest SES quartile to 64.6 per cent for the highest SES quartile. (Table 19)

Regional comparisons

Year 12 completers in Gold Coast Region had comparable patterns in post-schooling destinations to South-East Queensland and statewide Year 12 completers. However, those from Gold Coast Region were less likely than statewide to enter employment-based training. (Figure 2)

Year 12 completers not in education or training in Gold Coast Region had similar employment destinations to South-East Queensland and to statewide Year 12 completers. (Figure 5)

The occupations and industry categories of Year 12 completers in Gold Coast Region also showed comparable patterns when measured against those of Year 12 completers statewide however there were differences in proportions. Of the occupation categories, those from Gold Coast Region were more likely than statewide to be Sales Assistants and with regard to industry categories were more likely to be in Retail and Accommodation and Food Services. (Table 7 and Table 8)

The main reasons given for not studying in Gold Coast Region Year 12 completers resemble those from South-East Queensland and statewide. However, those from Gold Coast Region were more likely than South-East Queensland and statewide to want a break from study offset by being less likely to be not interested in further studies. (Table 10)

Gold Coast Region Year 12 completers who were not learning, not earning and not seeking work show strong differences in main reasons for not seeking work than to those of South-East Queensland and statewide. Those from the Gold Coast Region were less likely than South-East Queensland and statewide to indicate family commitments, study commitments and disability as main reasons for not seeking work. Travel, sporting commitments and not feeling ready for employment were more common reasons for Gold Coast Region completers than South-East Queensland and statewide. (Table 11)

Comparisons over time

Comparisons between the destinations of Year 12 graduates from Gold Coast Region for the years 2006, 2007, 2008, 2009 and 2010 reveal changes and emerging trends. The 2010 data when compared to the 2009 data show an increase in university, apprenticeships and seeking work. There was a decrease in campus-based VET destinations, working full-time and working part-time destinations.

Emerging trends show a yearly decrease in traineeships although this has remained steady in 2010. There is also a yearly decrease in working full-time since 2008. (Figure 4)

More information on the survey is available at www.education.qld.gov.au/nextstep.

Main destinations

All respondents were categorised into their main destination, as outlined in Table 1. Tertiary students are assigned to the study categories regardless of their labour force status (i.e. they may also be working or even looking for work).

Table 1 Main Destination Categorisations, Next Step 2010

<i>Higher Education</i>	
University (degree)*	Studying at degree level
<i>VET categories</i>	
VET Cert IV+*	Studying Certificate IV, Diploma or Advanced Diploma (excluding apprentices and trainees)
VET Cert III*	Studying Certificate III (excluding apprentices and trainees).
VET Cert I-II/other*	Studying Certificate I or II (excluding apprentices and trainees). This category also includes students in an "unspecified" VET course, or in other basic courses (e.g. Year 12, bridging course, etc.) and with an unknown course level
Apprentice	Working and in employment-based apprenticeship
Trainee	Working and in employment-based traineeship
<i>No further education or training</i>	
Working full-time	Working full-time (35 hours or more per week) and not in a study or training destination. This includes people with part-time or casual jobs that total 35 hours or more
Working part-time	Working part-time or casual (fewer than 35 hours per week) and not in a study or training destination
Seeking work	Looking for work and not in a study or training destination
Not studying and not in the labour force	Not in study or training, not working and not looking for work

*Some respondents are also in the labour market
