

School Disciplinary Absences by DET Region

Reports and statistics – 2006 to 2010 Calendar Years

Version 3, 15/04/2011

The information presented in the following tables relates to school disciplinary absences applied in state schools over the five school years, 2006-2010

The School Disciplinary Absence (SDA) data presented comprise the total of short suspensions (1-5 days), long suspensions (6-20 days), suspensions with proposal/recommendation for exclusion and cancellations of enrolment.

A student may be suspended or excluded from a State school or schools because of disobedience, misconduct or other conduct that is prejudicial to the good order and management of the school.

A student may be suspended or excluded from a state school or schools because of disobedience, misconduct or other conduct that is prejudicial to the good order and management of the school. A student may also be excluded from a state school for contravention of a Behaviour Improvement Condition.

Suspension prohibits a student from attending an educational institution for a nominated period of time (from 1-5 days or 6-20 days). Decisions to suspend a student are made by individual state school principals.

On 5 November 2010, state school principals were given the power to exclude students from their school. They may recommend the decision to their supervisor if they believe it is inappropriate for them to make the decision.

Exclusion is only proposed/recommended where student behaviour is so serious that suspension is inadequate to deal with the behaviour. Exclusion prohibits a student from attending one or more state educational institutions for a nominated period of not more than 12 months or permanently, with the opportunity to make a submission against the exclusion and to also have the exclusion revoked annually until the age of 24. Decisions to exclude a student from a state school are made by the principal or the principal's supervisor. Decisions to exclude a student from more than one school in a region are made by the principal's supervisor.

The principal can cancel the enrolment of a post compulsory age student if the student displays persistent refusal to participate in the program of instruction.

The information shows counts of incidents, where an incident is a record in the School Disciplinary Absence Collection (SDAC) system and OneSchool from Semester 2, 2009 of a suspension, suspension with a proposal/recommendation for exclusion or cancellation of enrolment. It is important to understand that incident figures do not equate with the number of students subject to a school disciplinary absence (e.g. One student may be suspended several times in a school year. Each time a student is suspended it is recorded as a separate incident in the SDAC/OneSchool. A total incident count of 20 therefore, may not mean 20 students have been subject to a suspension).

Student Disciplinary Absences are collected and reported within the DET annual report for each financial year. The SDAs contained in the DET annual report represent the historical time series of SDA reporting. Tables from the DET annual report are available at:

- [2009 - 2010](#)
- [2008 - 2009](#)
- [2007 - 2008](#)
- [2006 - 2007](#)

Schools are also required to report SDA in their School Annual Report, based on each school year. SDA information by school, region and the state, based on the school year, is provided for monitoring purposes. These data are drawn from SDA incidents entered by schools within corporate systems. These data do not reflect the outcomes of

Caveats:

On 5 November 2010, state school principals were given the power to exclude students from their school. They may recommend the decision to their supervisor if they believe it is inappropriate for them to make the decision.

2. The information is displayed in terms of aggregate counts of incidents. These data do not represent the outcomes of any related appeal decisions.

3. The enrolment figures are counts of full-time students which are sourced from the annual August Student Census.
