

## Master teacher school identification

### Guide

#### School details

School details have been drawn from the DET schools directory and include centre code, name, type, band and region.

#### Initial identification of eligibility

An initial number of schools were identified by applying the attached NAPLAN data process to band 7-10 schools and identifying those currently performing well but with the potential for improvement. This will complement the priority reviews for schools identified as needing further support, and the increasing local autonomy available to high-performing schools. It will also complement the differentiated support currently provided by regions to very large and very small schools.

- A. Is the school within Bands 7-10?
- B. Is the school within the 2014 target NAPLAN\* range?

Schools, for which the answer to BOTH questions was "Yes", were identified as eligible to be included in those schools receiving a master teacher position.

#### Regional consultation

To ensure local needs and context were considered, regions were closely consulted to determine how master teachers positions are to be established within a clearly defined regional quota. This includes clustering arrangements and additional sites (e.g. schools of distance education and special schools) to maximise the impact of the master teacher investment as determined by regions to meet local needs.

Regions identified schools on the following basis:

- A. Schools identified by 2013 NAPLAN data (using the same methodology as Stage 1) as offering opportunities to maximise performance lift.
- B. Schools whose inclusion in clusters was identified as meeting local need i.e.:
  - *Proximity*  
Located close to one another and ideally situated to share a master teacher.
  - *Existing partnerships*  
Includes primary-high transition strategies and feeder schools, shared staffing, facilities or programs/services.
  - *Common approaches*  
Sharing common approaches to pedagogy, curriculum, student services and/or parent/community engagement.
  - *Special schools and Schools of Distance Education*

#### Allocated master teacher (see Schools and cluster list)

The final column indicates if a school is to receive a master teacher. Please note that some schools will receive a dedicated master teacher while other schools may be included in a cluster sharing one or more master teachers, as determined through regional consultation. For details please refer to the Master Teacher School/Cluster Schools list <http://www.education.qld.gov.au/staff/development/employee/teachers/master-teachers.html>
