

Curriculum activity risk assessment

Challenge High Ropes

clever • skilled • creative

Activity scope

This document relates to student participation in High Challenge Ropes as a curriculum activity.

'High challenge' refers to any ropes activity for which the participant's safety can no longer be achieved by spotting, and which requires safety systems such as harnesses, belay systems, specialist safety equipment or other established methods or systems.

High ropes courses enable students to participate in activities which are challenging, which help build self-confidence, determination, cooperation and decision-making skills, and which develop physical attributes such as balance and flexibility.

It is highly recommended that the [Queensland Adventure Activity Standards](#) are referred to when planning this activity.

Risk level

The actual risk level will vary according to the specific circumstances of the activity and these **must** be considered when assessing the inherent risk level and planning the activity. As a starting point, ask the following questions:

- Which students will be involved?
- Where will the students be?
- What will the students be doing?
- Who will be leading the activity?
- What will the students be using?

Risk level		Action required / approval
<input type="checkbox"/>	High	Likely chance of a serious incident and injury requiring medical treatment <ul style="list-style-type: none"> <input checked="" type="checkbox"/> A <i>Curriculum Activity Risk Assessment</i> must be completed. <input checked="" type="checkbox"/> Principal or delegated Deputy Principal or Head of Program (i.e. HOD, HOSES, HOC) to review and approve risk assessment. <input checked="" type="checkbox"/> Parental permission must be obtained for student participation. <input checked="" type="checkbox"/> Once approved, activity details are to be entered into the <i>School Curriculum Activity Register</i>.

Teachers/leaders:

Activity description:

Start date:

Finish date:

No of students (approx.):

Class groups:

Supervision ratio (approx.):

Queensland Government

Listed below are the minimum recommendations for this type of activity. For any items ticked 'No', provide further information regarding the additional or alternate controls to be implemented for the safe conduct of the activity.

Minimum supervision

Adequate adult supervision is to be provided. In determining what is adequate, consider the number of students, their individual needs, and the nature of the activity. If an adult other than a registered teacher is engaged for instruction, a teacher should be present to take overall responsibility. [Blue Card](#) requirements **must** be adhered to.

Registered teacher with minimum qualifications as outlined below

OR

An adult with minimum qualifications as outlined below, in the presence of a registered teacher

Other supervisors should be selected from those most suitable for this particular activity. Before they start, the supervisors should be informed of their role, potential hazards and precautions to be taken.

When planning any outdoor activity, the ratio of qualified, experienced leaders to dependent participants needs to be considered. In certain situations, judgement may dictate smaller or larger numbers of participants per leader.

Several variables can affect this decision, including but not limited to:

- nature of the challenge ropes course elements
- line of sight and sound for supervision
- outcomes of the risk management process
- leaders' experience
- participants' expected capabilities (i.e. experience, competence, fitness)
- conditions (environment, weather)
- belay system and transfer (dynamic, static or continuous)
- planned duration of the activity
- number of participants and optimum group size
- remoteness of the activity
- suitability and availability of equipment.

Further information:

Minimum qualifications

The qualifications listed in this section are minimums for each type of situation. Leaders are encouraged to seek training to raise their qualification level above the minimum listed.

- Current first aid qualifications including Cardio Pulmonary Resuscitation (CPR) or ready access to first aid facilities, including qualified personnel.
OR
- Remote Area first aid if operating more than one hour away from emergency services
- [Blue Card](#) requirements met

High — High ropes

Demonstrated skills and currency that meet the leadership, group management, technical capacities and safety requirements (including familiarity with the environment, emergency procedures by all adult participants) of the specific circumstances being addressed

For management of challenge ropes course, a challenge ropes course manager (high ropes) is required. Management can also be carried out by people who have received training from an approved high ropes constructor

For a registered teacher:

- A statement of attainment from a registered training organisation covering the following unit of competence:
 - SROCP002A — Conduct a high ropes session**OR**
- Certificate III in Sport, Outdoor or Community Recreation or higher, with specialisations in appropriate activities
OR
- A registered leader under the National Outdoor Leader Registration Scheme, at the level of Challenge Ropes course conductor (High Ropes).

For a leader other than a registered teacher:

- A statement of attainment for a nationally recognised course or Skill Set, at the level of High Ropes conductor, from a Registered Training Organisation
OR
- Certificate III in Sport, Outdoor or Community Recreation or higher, with specialisations in Conducting High Ropes
OR
- A registered leader under the National Outdoor Leader Registration Scheme, at the level of Challenge Ropes course conductor (High Ropes).

Hazards and suggested control measures

All persons engaging in this activity should:

- identify the hazards, including any additional hazards not mentioned here
- assess their significance
- manage the potential risks.

Listed below are indicative hazards/risks and suggested control measures. They are by no means exhaustive lists. After checking these, add details of any other identified hazards/risks and additional controls you intend to implement.

Hazards/risks	Control measures	Yes	No	Implementation plan / Additional controls
Biological material <ul style="list-style-type: none"> • Bodily fluids (e.g. blood, sweat, saliva) 	<ul style="list-style-type: none"> • Ensure that personal items such as towels and drink bottles are not shared. • Have sufficient and suitable containment material (bandages etc.) readily available. • Comply with HLS-PR-004: Infection Control and Management of Prescribed Contagious Conditions and Infection Control Guideline. Students with open cuts and abrasions are to be removed from the activity and treated immediately. If bleeding cannot be controlled completely, the participant should not be allowed to return to the activity. All clothing, equipment and surfaces contaminated by blood should be treated as potentially infectious. 	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	
Environmental conditions <ul style="list-style-type: none"> • Weather • Surfaces • Surrounds 	<ul style="list-style-type: none"> • Assess weather conditions before and during activity (e.g. temperature, storms). • Assess suitability of surrounds. • Check surrounds for loose items, debris and hazards. 	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	

Approval	
<input type="checkbox"/>	Approved as submitted:
<input type="checkbox"/>	Approved with the following condition(s):
<input type="checkbox"/>	Not approved for the following reason(s):
By:	Designation:
Signed:	Date:
Once approved, activity details should be entered into the <i>School Curriculum Activity Register</i> by administrative staff.	
	Reference no.

Monitor and review <i>To be completed during and/or after the activity and/or at the completion of the series of activities.</i>	Yes	No
Are the control measures still effective?	<input type="checkbox"/>	<input type="checkbox"/>
Have there been any changes?	<input type="checkbox"/>	<input type="checkbox"/>
Are further actions required?	<input type="checkbox"/>	<input type="checkbox"/>

Glossary and important information

CARABINER: A **carabiner** or **karabiner** (colloquially: *crab*, *snap-link*, *krab*, or *'biner*) is a metal loop with a sprung or screwed gate. The loop part opposite the gate is referred to as the spine. It can quickly and reversibly connect components in safety-critical systems.

COW'S TAILS/CLAWS: A **cowstail** is defined as a short strap, lanyard or sling connected to the main attachment point of a harness. Cowstails are used to connect the harness to the safety line via a back-up device and to the working line via an ascender. Cowstails should be able to withstand any dynamic forces that may be imposed on them in case of a fall. Please refer to the [OHS Code Explanation Guide](#) for more information.

PRUSIK LOOP: A **Prusik** is a friction hitch or knot used to put a loop of cord around a rope. This is applied in climbing, canyoneering, mountaineering, caving, rope rescue, and by arborists.

BELAYING: **Belaying** refers to a variety of techniques used in climbing to exert friction on a climbing rope so that a falling climber does not fall very far.

Further information

For further information on incorporating risk management strategies into curriculum activity planning refer to [HLS-PR-012 Managing Risks in Curriculum Activities](#) and the associated list of [Curriculum Activity Risk Assessment Guidelines](#). (See: <http://education.qld.gov.au/strategic/eppr/health/hlspr012/index1.html>)

For further support with risk management training and advice, contact trained staff in schools such as Workplace Health and Safety Officers (WHSOs) and Workplace Health and Safety Representatives (WHSRs), and regional staff such as Senior Health and Safety Consultant.
