

## ACTIVITY COMPLETION REPORT

An Activity completion report is required annually and at the completion of each approved animal-use activity.

For operational and statistical reporting consistency, the annual Activity completion report should be **submitted for each calendar year by November** of that year.

If activity approval expires in Terms 1-3, or if the activity is discontinued, a final Activity completion report must be provided within 2 months of expiry of the activity approval or the discontinuation of the activity. If the activity approval expires in Term 4, the annual Activity completion report will be taken to be the final report.

New applications for other activities will not be considered unless activity completion reporting is up to date.
