

Investigations can answer questions

My question

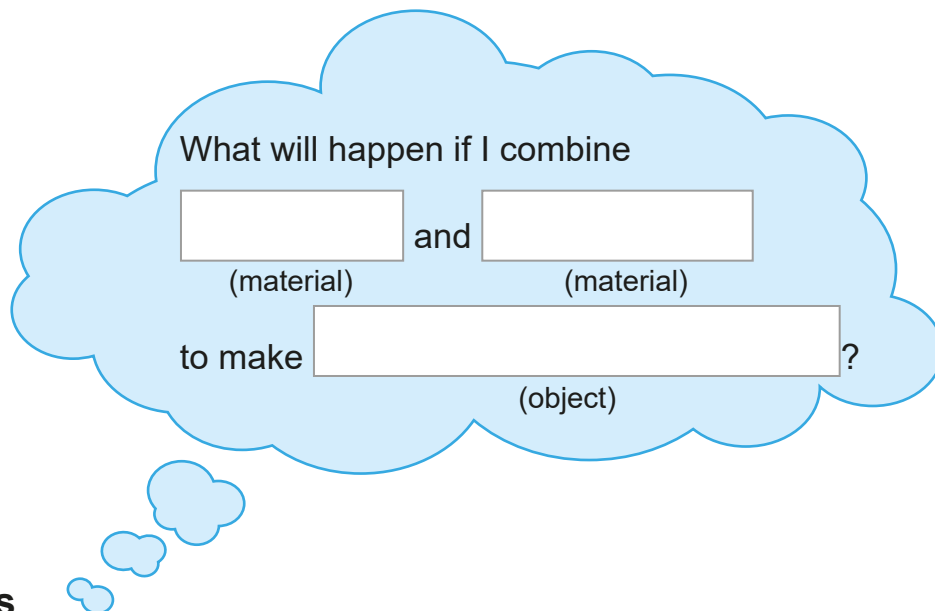

What will happen if I combine

and

(material) (material)

to make ?

(object)

Materials

Draw and label the materials. Add words to describe their properties.

My prediction

Finish the sentence below.

I predict the will
(object)

(describe purpose)

because

(describe how the materials are suited to the purpose)

Results

Draw and label the object. Describe what was done to the materials to create this object.

Evaluation

Discuss these questions:

Why is this object suited to its purpose?

What could be done differently to improve the object?

Could anything else be used for the same purpose?

For what other purpose could the object be used?

How else have you seen the materials used?
