Curriculum support for students unable to access a school

Science Year 9

PACKAGE 4

This package of curriculum resources provides learning opportunities for students to continue their educational development and progress while not being able to access a school.

It is anticipated that the resources could be used in a variety of contexts, including teacher-directed, parent-supported or students working independently.

As students work through these resources, it is important that regular contact be maintained between classroom teachers and parents/students.

No assessment lessons or tasks are included in this package.

Structure

The materials contained in this package include:

- lessons including links to resources
- lesson notes and answers.

Lessons

There are four lessons contained in this package. Students will need to complete them in the following order:

- Lessons 1–2 — Examining the evidence
- Lesson 3 — Understanding the role of heat
- Lesson 4 — Representing diverging plate boundaries

Resources

Required resources are listed in the materials.

Students:

- will need access to everyday stationery supplies, such as pencils, pens, an eraser, colouring pencils
- may print the worksheets if they have access to a printer, or write responses in an exercise book or on paper
- may need access to an internet search engine to locate particular educational resources or websites.

Notes

Practical experiment work in this sequence of lessons is optional. If your child has access to the required materials and equipment, they must conduct a full risk assessment, wear appropriate personal protective equipment and have adult supervision before commencing any experiment.

Online safety warning

Assess websites for suitability prior to displaying to your child.
