

Personal Protective Equipment the last line of defence

Some hazards can't be eliminated or reduced by other risk controls.

Personal protective equipment:

- 🔊 **Wear it** in conjunction with other safety control measures
- 🔍 **Check it** to make sure it fits properly and comfortably
- 🔄 **Replace it** if it gets damaged or stops providing protection

If you fail to wear the correct hearing protection, this could lead to hearing issues

Don't be
a statistic.
